SAFE COMMUNITIES

SMART Safety & Security (S3) Training, Tools and Resources in a Secure Digital Environment for Personal and Public Safety
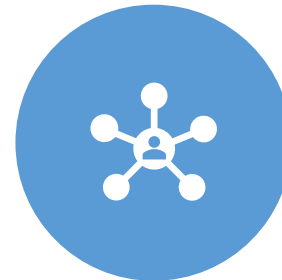

'SAFE COMMUNITIES" is a digital community partnership. This partnered community-based and community-wide personal safety and public safety engagement program provides critical information, training and digital resources community officials and leaders need, to improve community resilience, today

We are committed today more than ever, to raising awareness and delivering critical information, training and resources local officials and leaders need, to engage citizens in community-based and community-wide personal and public safety, today

We are targeted to reach 12,000+ U.S. communities during 2020-21

Communities need to become SMARTER to respond to local challenges and citizen needs. We provide SMART solutions for local challenges to help local leaders transform their communities and create value for their citizens, today

Digital Community Partnership
Community-based and Community-wide Engagement

Challenges & Opportunities

Communities, enterprises and organizations have mandated to implement safety plans, review and update the plans each year, and record and report the plans to local authorities

Organizations are required to submit a safety plan that outlines procedures for emergency situations. As a best practice, safety plans should also incorporate hazards such as widespread flu and pandemic

Many communities, enterprises and organizations lack clear guidance on a safety plan development, accountability systems to document that plans have been completed, and process for assessments or feedback on safety

With communities, enterprises and organizations tasked to do more with less, public safety cannot take a backseat

Communities are not properly trained nor equipped to digitize community Safety on their own

"SAFE COMMUNITIES" community-based and community-wide personal safety and public safety engagement program is ready for implementation in communities, today

Community-based and Community-wide Engagement.

Community Safety Plan Evaluation Steps

| Operational Environment Review	Organization of Safety Operations	Review of Current Technology	Assessment (SEOA)	Identify risk area, potential problems	Launch of Action Plan for Safety	Training and Practice Plan	Communication Plan Rollout

Typical timeline is approximately 8-10 weeks for assessment and then Digital Community Safety Plan implementation

SMART Training Platform for Communities

- SMART Learning Environment
- Cloud-based
- Mobile
- Artificial Intelligence
- Machine Learning
- Social Micro Learning

We deliver "SAFE COMMUNITIES" training program to communities through an award-winning SMART Learning Environment. This platform was developed in partnership with SMART Community Exchange and 100+ Educational Institutions, 2000+ Educators, 40.000+ Students and thought leaders in Education, Technology, ICT, IoT, Business and Government

COMMUNITY
Benefits

- Improves Resilience
- Builds Safety Climate
- Supports Digital Transformation
- Builds 21st Century Workforce
- Creates New Jobs
- Attracts Business Investment
- Accelerates SMART Growth
